For the life of your buildings

The company has **over twenty years experience looking after buildings**

and delivering support services for people who own and use buildings; ensuring customers get the best possible value from their built assets and this includes ensuring new buildings meet the requirements of the building regulations and **pt's** quality standards. The diagram opposite illustrates the centres of excellence in the business and provides a brief summary of the extensive range of services available. This represents a seamless array of integrated services tailored to meet the specific needs of our customers.

The most important aspect of our approach is in delivering **fully integrated solutions which support our customers' businesses and help them to be successful.**

To do this we look to employ high quality staff who are innovative, problem solvers, team players and who take responsibility. They have to have exceptional attention to detail and aim to delight their customers in both product and service delivery.

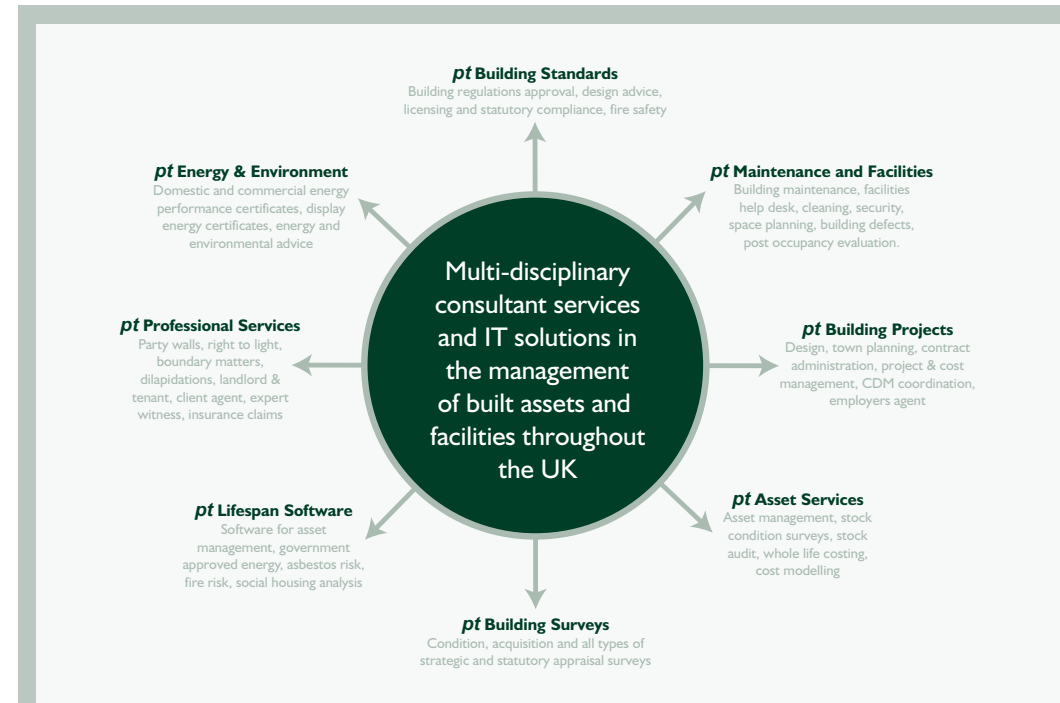

Valued Customers

Property Tectonics has a range of valued customers of all sizes from practically every sector. For example major projects in the health sector include building control services on a pioneering Breast Cancer Care Unit at the University Hospital of South Manchester NHS Foundation Trust, the first of its kind in Europe. We completed the internal refurbishment of the nuclear medicine department at Guy's and St Thomas' Hospital NHS Foundation Trust and provided various consultancy services for the Princess Alexandra Hospital NHS Trust. We have framework agreements with major educational institutions, such as the University of Hertfordshire and the University of Liverpool, as well as working on major asset management projects for Eton College and the University of Oxford.

We have long term framework agreements with the University Hospital of South Manchester NHS Foundation Trust and Britannia. We also partner with and work alongside some of the biggest local authorities and social housing providers in the UK.

A Growing Business

Property Tectonics has grown considerably over its twenty year history and is known for quality, for being innovative and for delivering comprehensive, joined up services with enormous value added. Its **personal, no nonsense approach coupled with committed customers** willing to partner and develop lasting relationships has made the company what it is today.
